

FIFA WORLD CUP

Five-Year Performance Analysis

(2002-2018)

Prepared By: Olukotun Damilola

Data Analyst | July 2026

Agenda

01

Methodology

How the 5-tournament dataset was cleaned and modeled

02

General Findings

Participation, totals, and highest/lowest performers

03

Scoring Trend

How goal output moved across five tournaments

04

France Focus

Year-by-year form across five World Cups

05

Goal Difference Extremes

The strongest and weakest margins recorded

06

Nigeria Deep Dive

A five-year record in focus

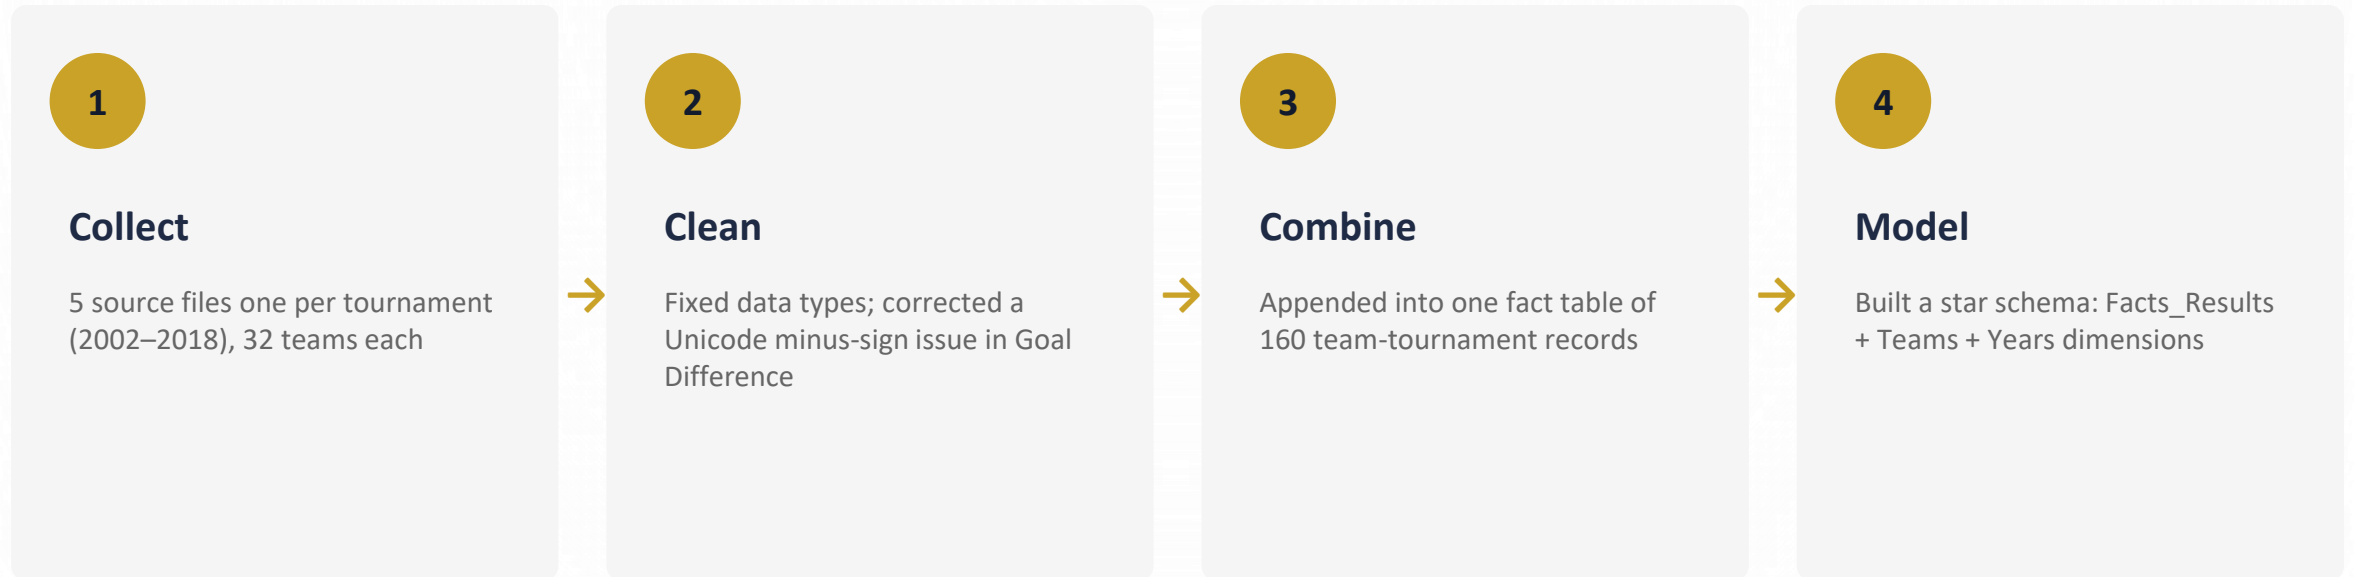

07

Conclusion & Recommendations

What the data means for Super Sport Gaming Co.

Methodology

From five raw tournament files to one analysis-ready model

Result: a 59-country, 5-tournament, 640-game dataset ready for flexible slicing by team or year.

General Findings — At a Glance

Combined totals across all 59 countries, 2002–2018

59

Countries Played

640

Games Played

247

Games Won

793

Goals Scored

887

Total Points

59 countries competed across the five tournaments — 10 of them, including Germany, Brazil, France, and Spain, played in every single one.

Highest & Lowest by Metric

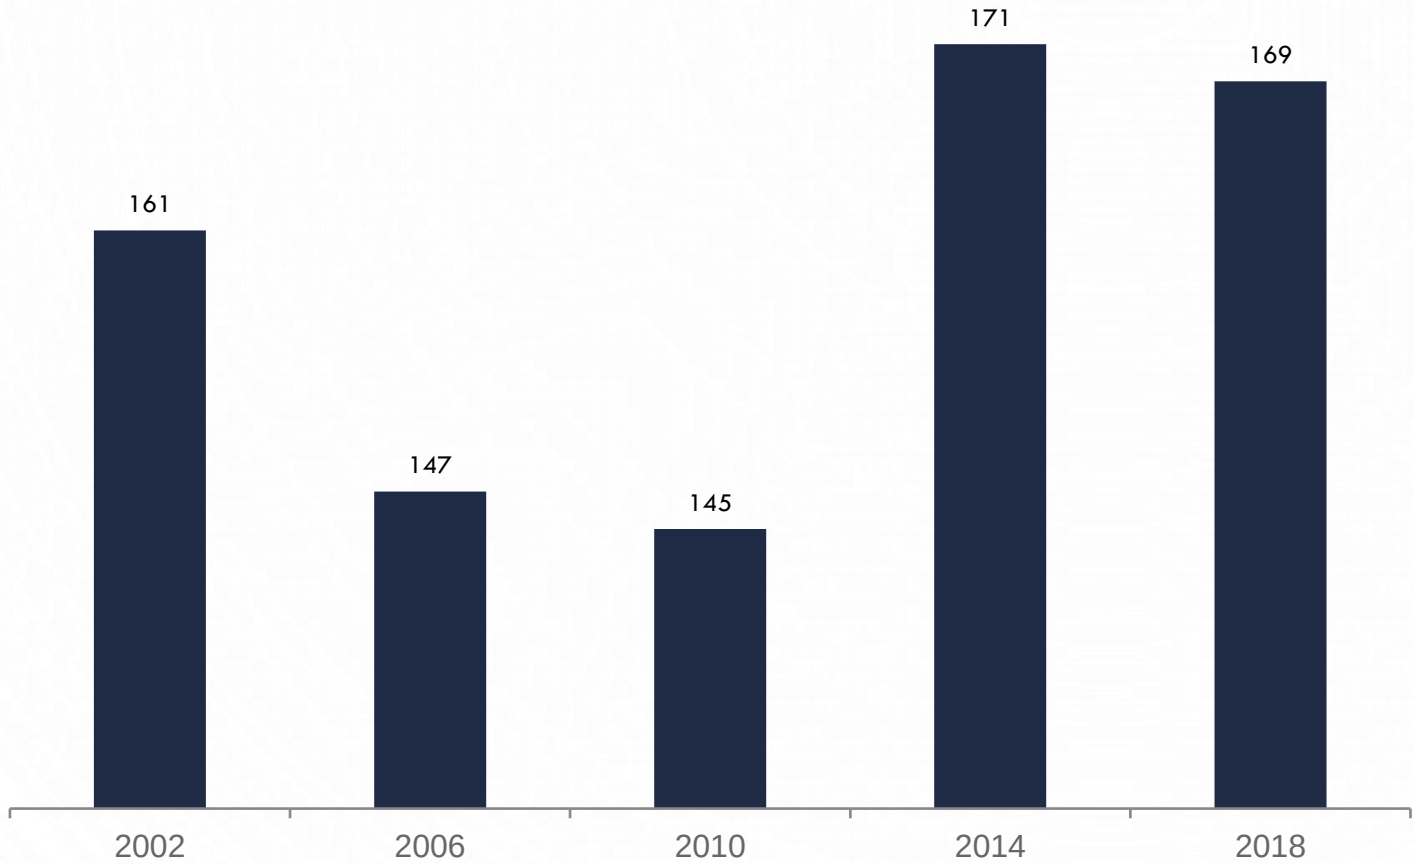

Combined totals, 2002–2018

Metric	Highest	Value	Lowest	Value
Games Played	Germany	31	Angola	3
Games Won	Germany	22	Angola	0
Games Lost	South Korea	9	New Zealand	0
Goals For	Germany	64	China PR	0
Goals Against	Brazil	27	Angola	2
Goal Difference	Germany	+42	Saudi Arabia	−22
Points	Germany	69	China PR	0

Germany leads on five of seven metrics — the standout performer of this five-tournament window.

Goal-Scoring Trend 2002–2018

Total goals scored across all matches, per tournament

Reading the trend

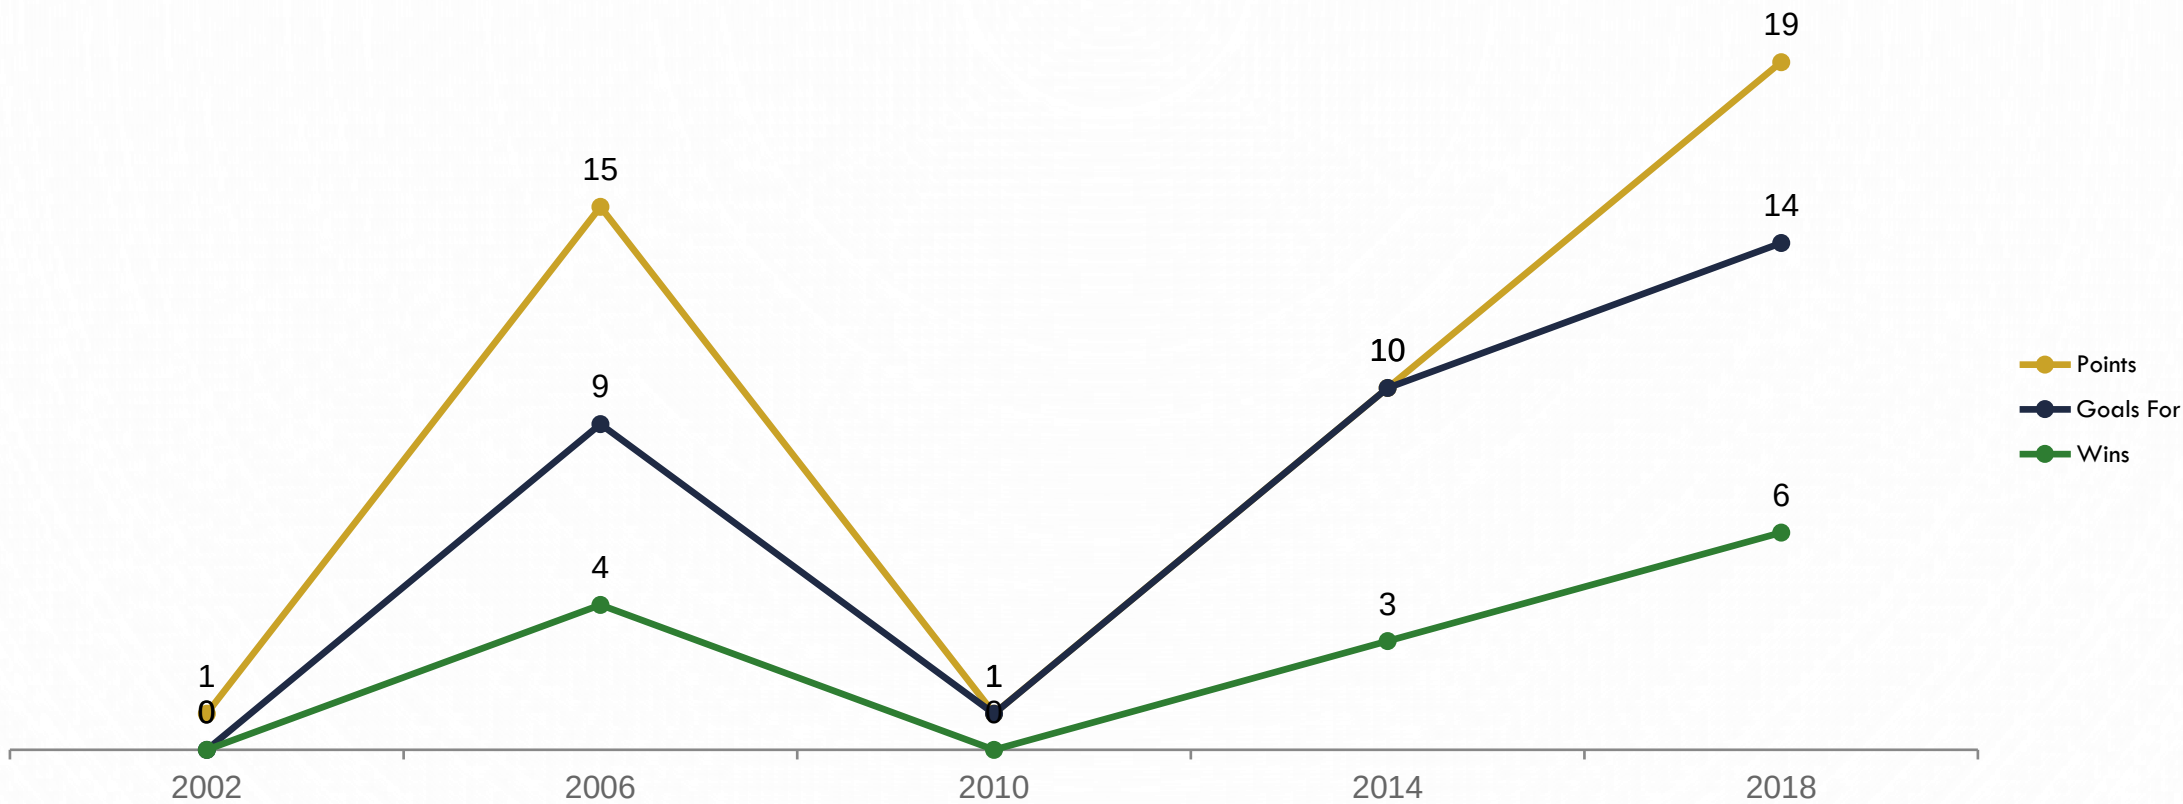

2002 → 2010: steady decline, from 161 to a low of 145 goals

2010 → 2014: sharp rebound to 171 the highest of the period

2018: remained strong at 169 goals

France — Five Year Tournament Analysis

Points, goals scored, and wins by tournament

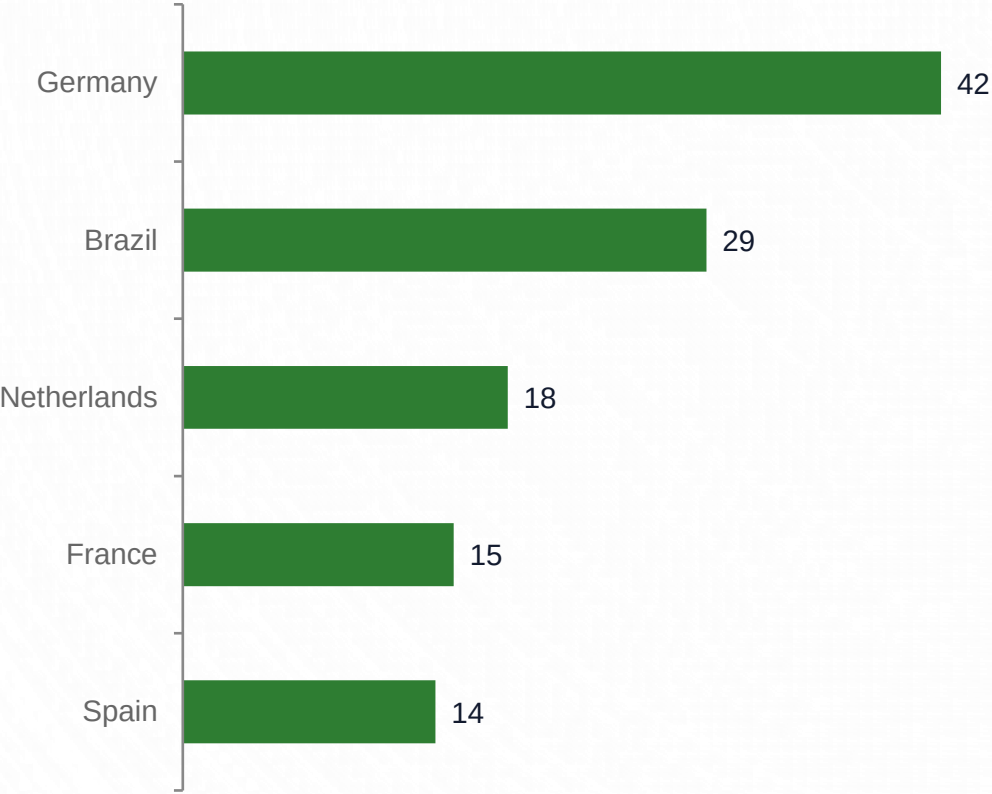

2018 was France's peak year on every measure — 19 points, 14 goals, 6 wins. 2002 and 2010 were their weakest, ending with a single point each.

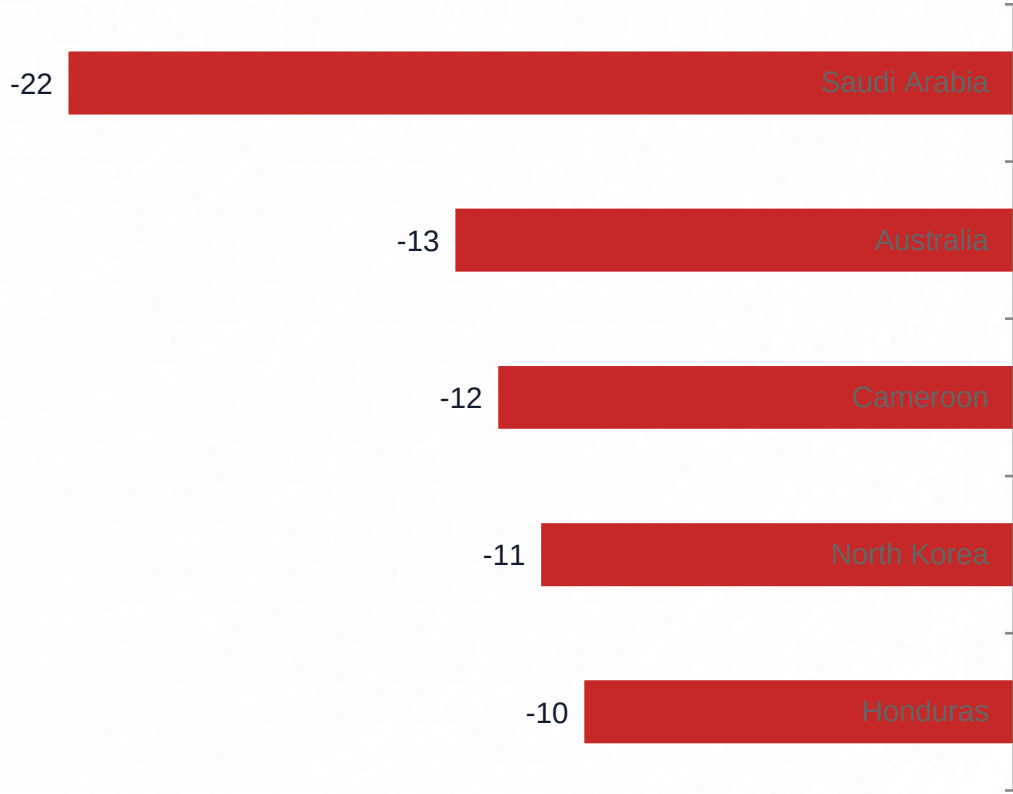

Goal Difference — Best & Worst

Combined goal difference across all 5 tournaments

Top 5

Bottom 5

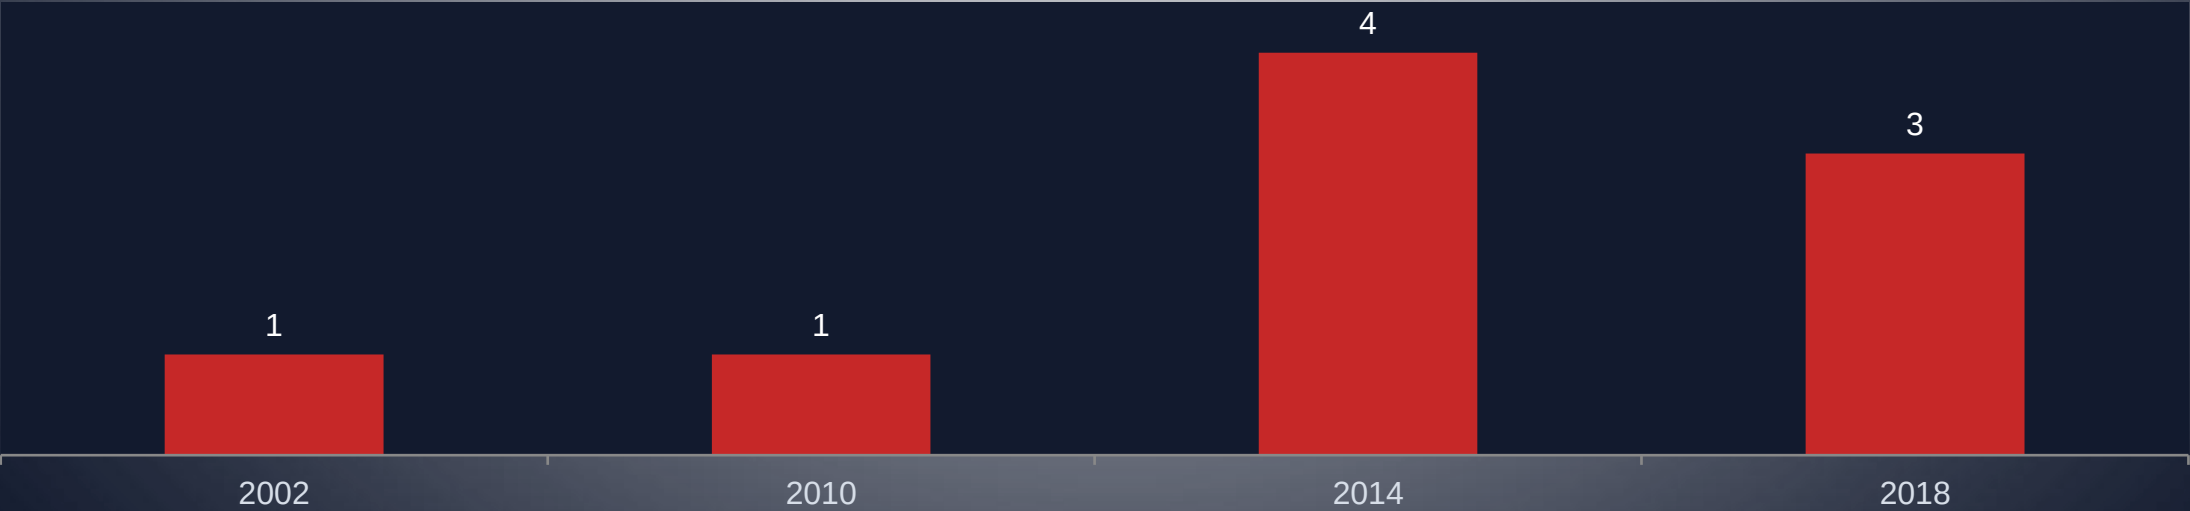

Germany's 42 is the widest margin recorded, roughly 45% clear of second-placed Brazil. Saudi Arabia's -22 is the weakest, driven largely by an 8–0 defeat to Germany in 2002.

Nigeria — Five-Year Record

Did not qualify for 2006

Points

Points earned per tournament — never enough to progress beyond the group stage in any of Nigeria's four appearances.

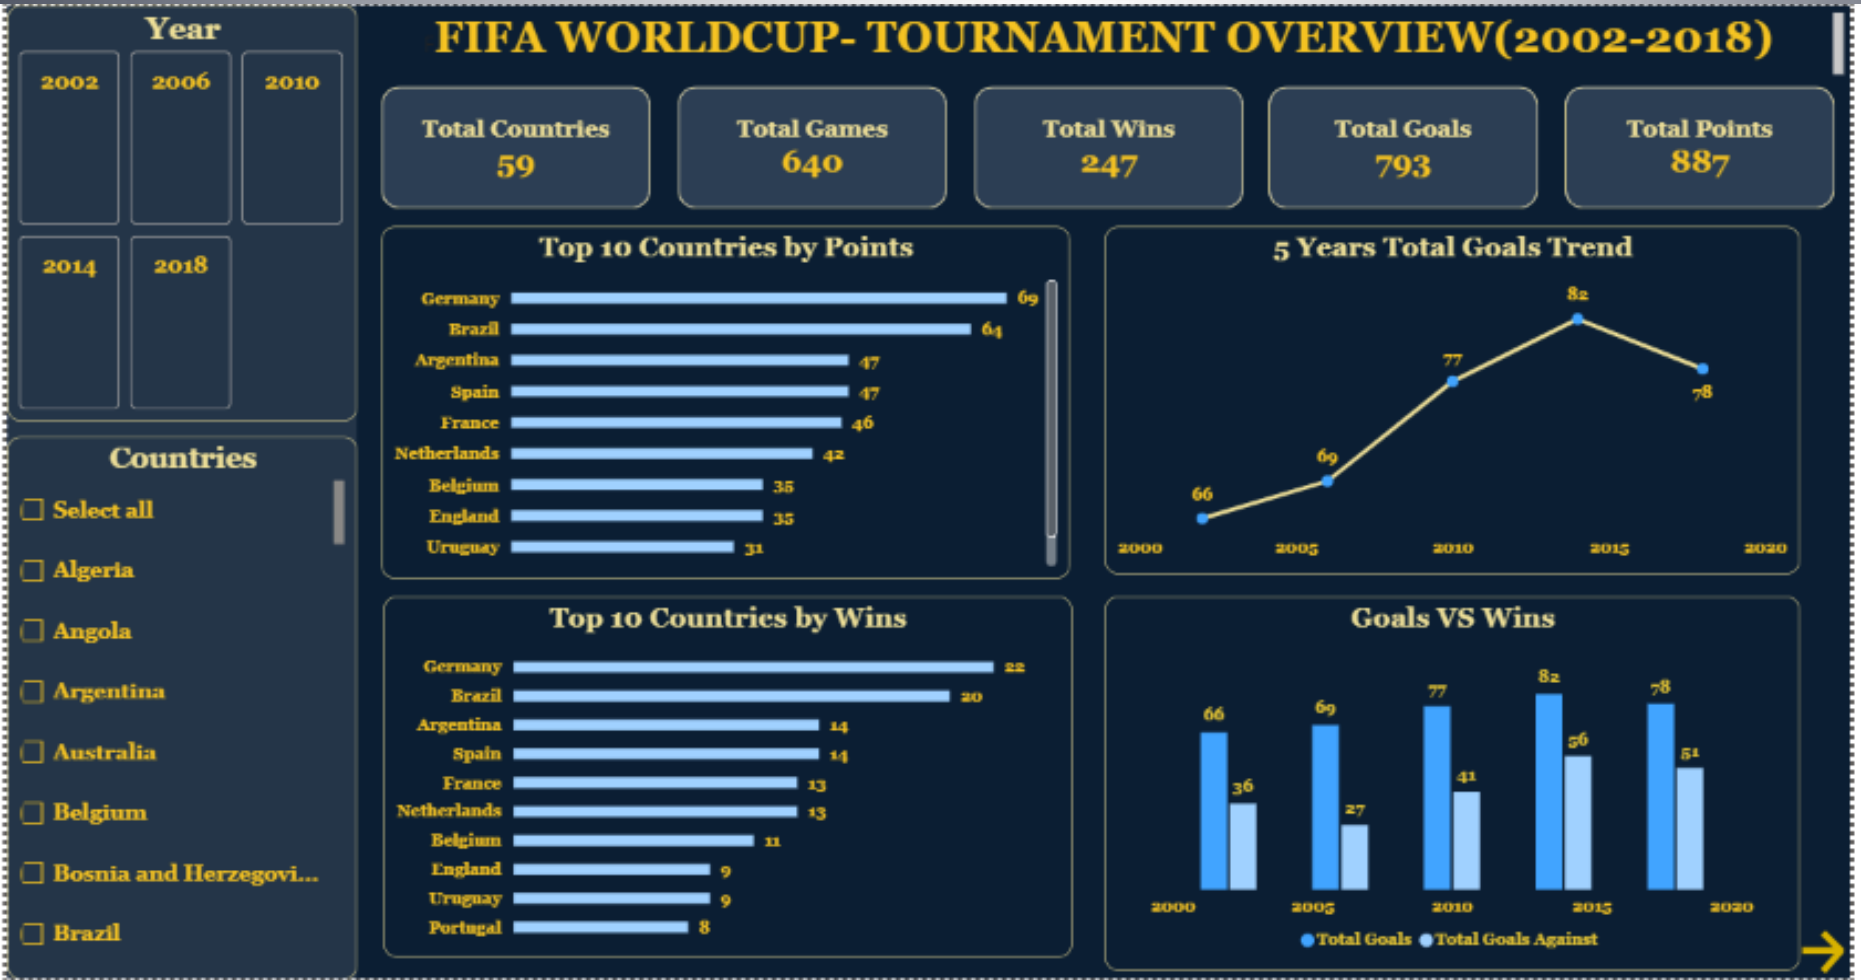

The Interactive Dashboard

Home — navigation hub for the Overview, Country Performance, and Tournament Comparative Analysis pages.

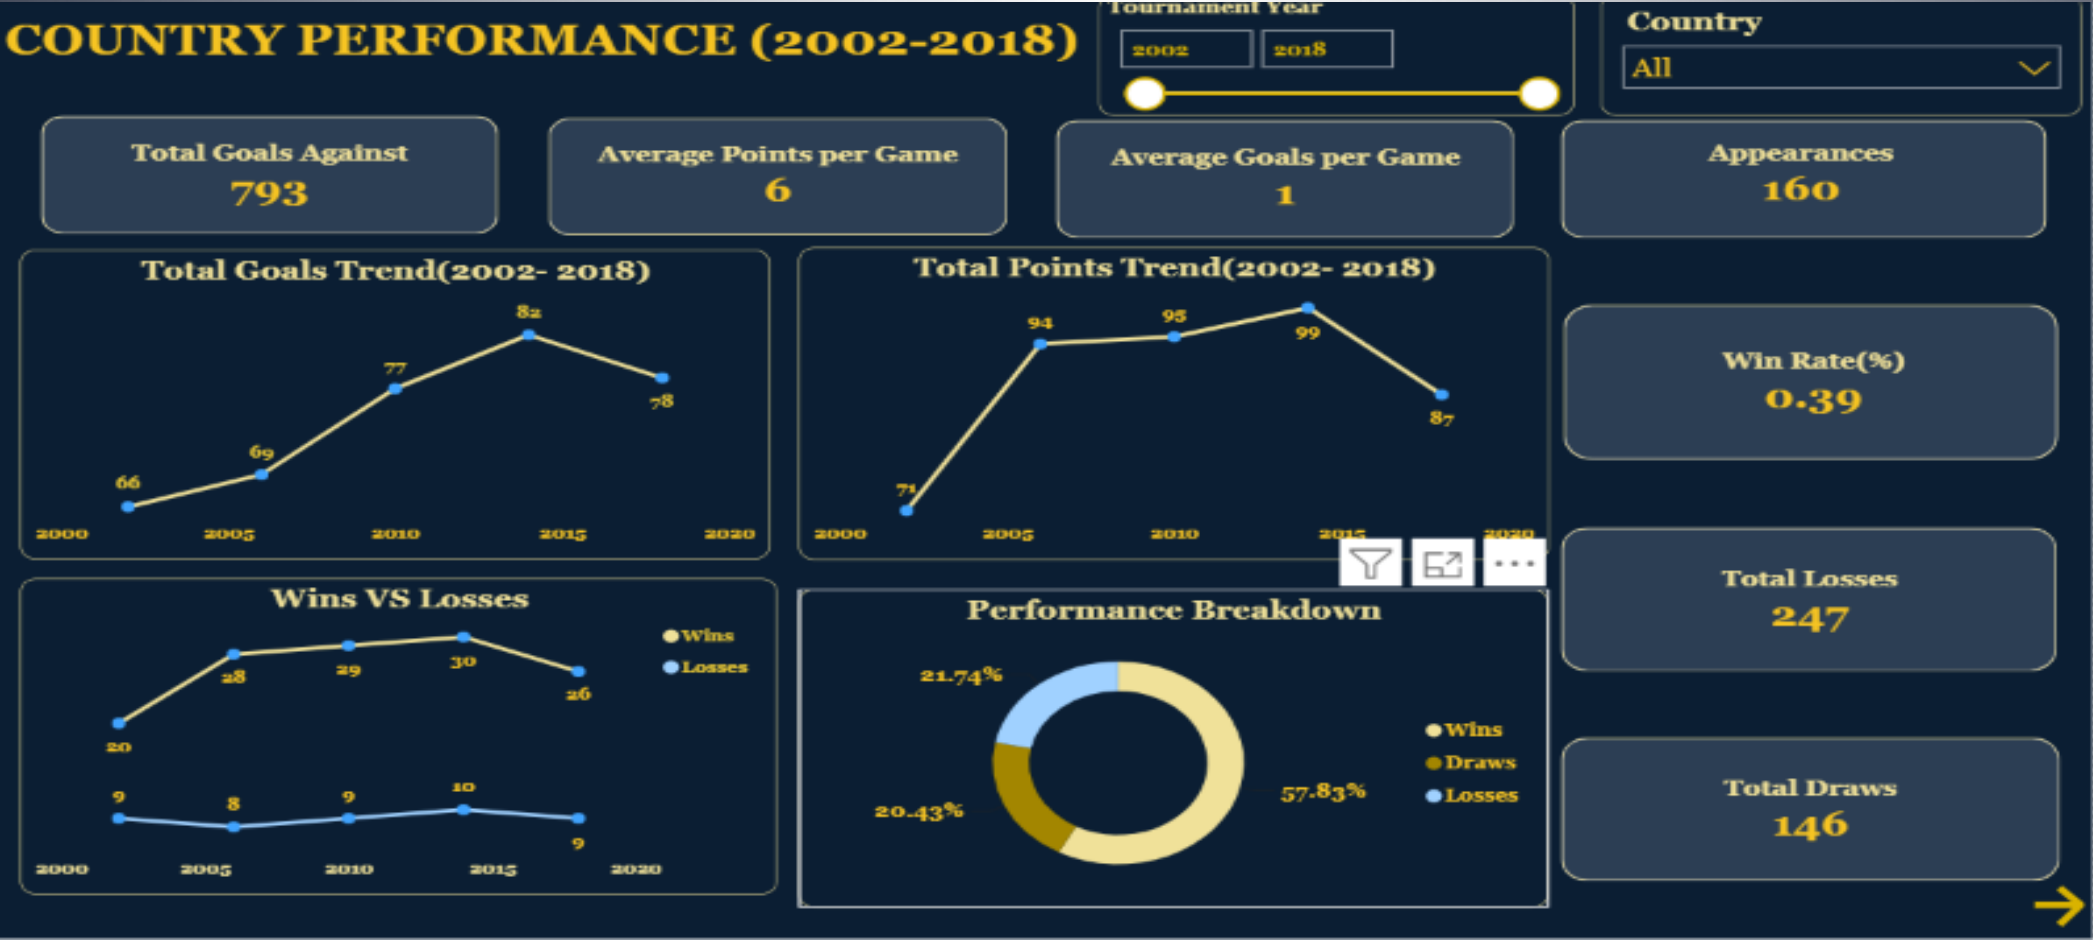

Dashboard — Overview

Combined 5 year KPIs, top-10 countries, and the goals trend

Dashboard — Country Performance

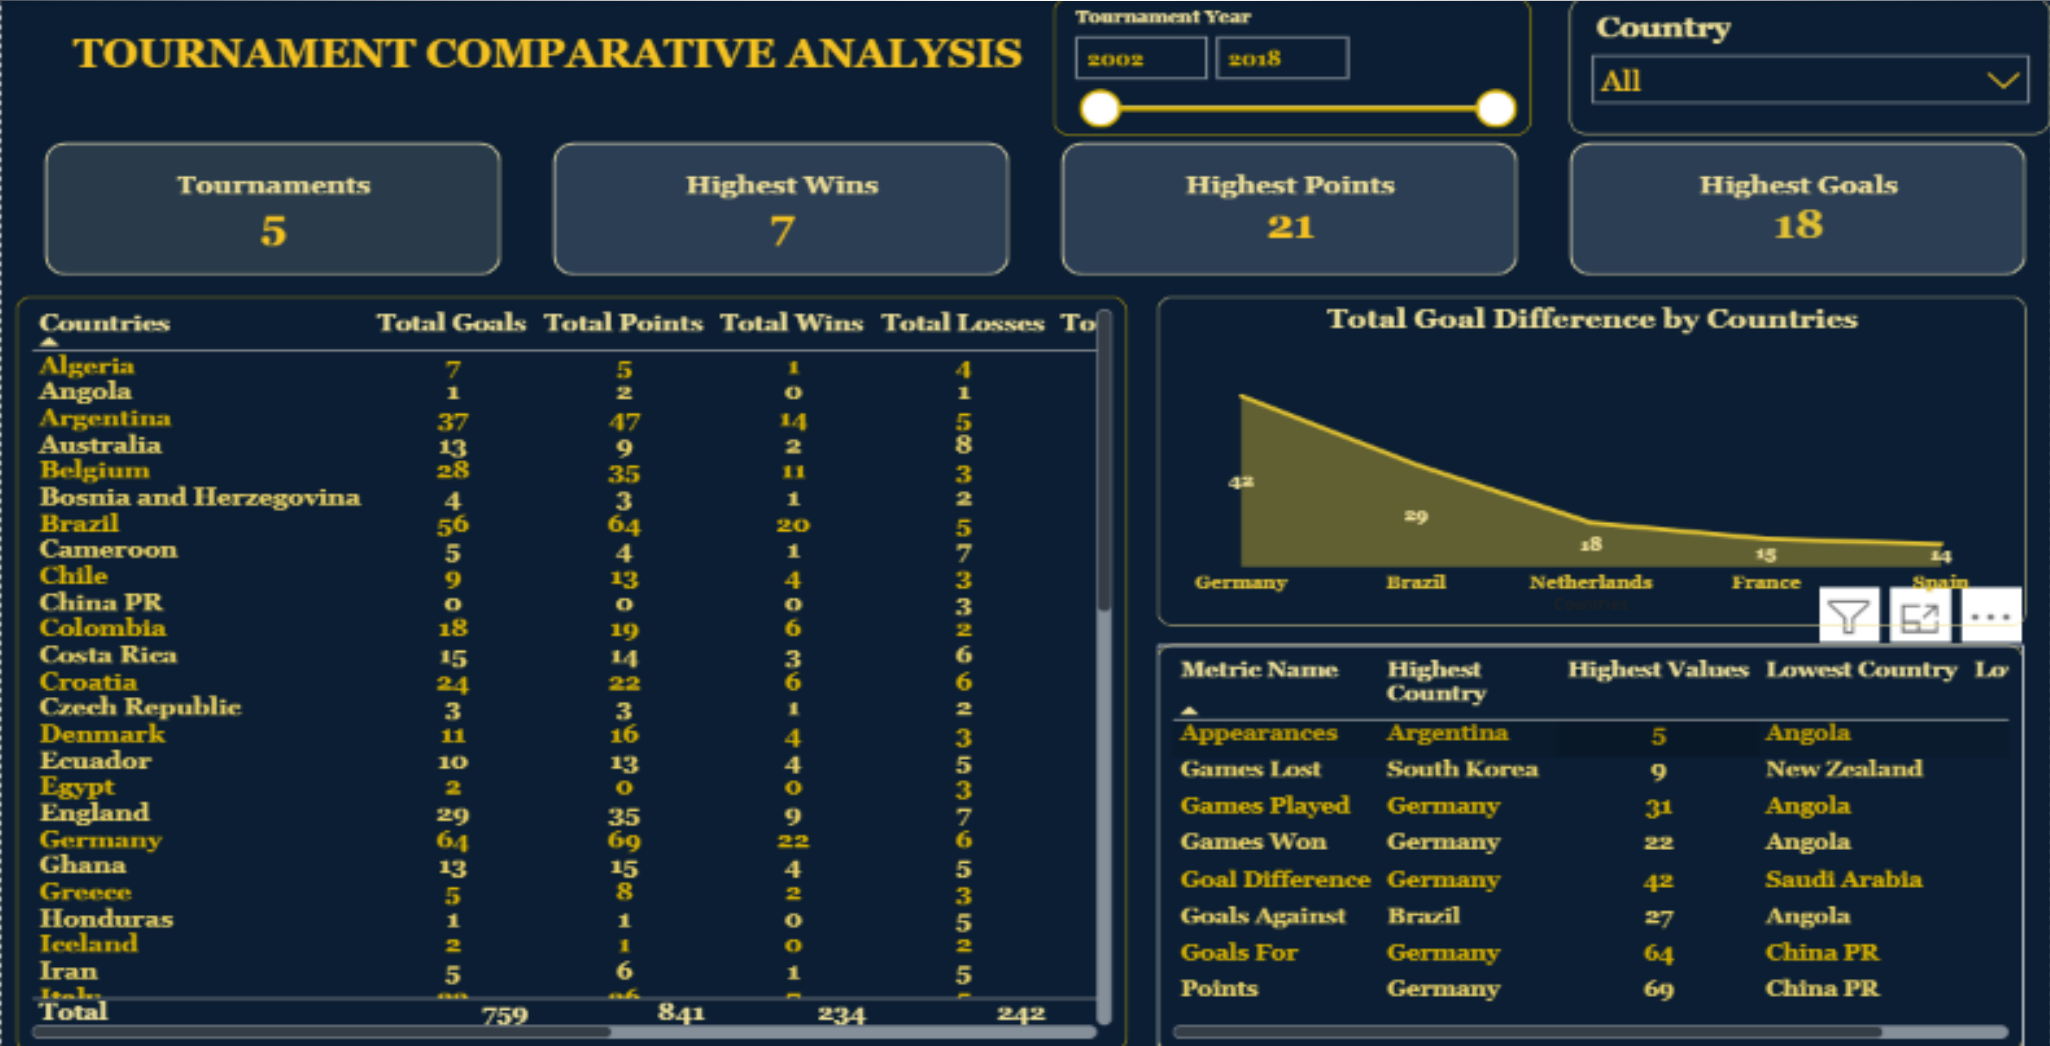

Goals and points trends, win/loss pattern, and result breakdown

Win Rate, Total Losses, and Total Draws update instantly as the Year or Country filter changes.

Dashboard — Tournament Comparative Analysis

Full country-by-country table, goal-difference chart, and highest/lowest lookups

Conclusion & Recommendations

Content Strategy	Germany, Brazil, and France's tournament histories offer the richest storytelling material given their consistent high performance.
Regional Angle	Nigeria's four-tournament record, while modest, may still resonate strongly with the Nigerian market and support regionally-targeted content.
Trend to Watch	Goal-scoring has risen since 2010 — worth monitoring in upcoming tournaments to see if the pattern continues.
